Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-16 are presented for reconsideration on the merits.

Response to Amendment

The amendment filed December 5, 2006, has been received and entered. The arguments were deemed persuasive and a proposed Examiner's amendment was offered to Applicants on February 13, 2006, and again on February 16, 2006, but they did not respond, hence upon updating the search a reference was discovered which reads on claim 1. Applicants' Representative can phone the Examiner if they decide to authorize the Examiner's amendment offered to the Applicants or respond to this office action with the appropriate changes that have been discussed which will put this case into condition for allowance.

Claim Objections

Claims 10-13 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 6-9. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k). It is suggested to cancel claims 10-13.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1651

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-16 are rendered vague and indefinite for the recitation of "metabolic product". It is unclear exactly what the "metabolic product" is per se. The metes and bounds of the claims can not be determined. Further, the term does not well define the claimed drug. Also the use of parentheses around the range amounts in the claims does not well define these amounts and the parentheses are a little confusing. In addition claim 16 is rendered vague and indefinite for being unclear as to whether the "incubating" step is carried out in a liquid medium. Applicants are urged to phone the Examiner to make the changes by Examiner's amendment already discussed to remove this rejection. Note the patentability conference has already been conducted for the Examiner's amendment already discussed and to remedy these issues set forth herein Applicants are advised to either make the specific changes discussed on February 16, 2006 or phone the Examiner and authorize the Examiner's amendment.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 1651

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by newly cited Bijl (US 5955321).

Claim is drawn to a metabolic product produced by *Rhosopseudomonas*.

Bijl teaches a metabolic product produced by *Rhosopseudomonas*, note column 3, lines 45-55.

The claim is identical to the cited disclosure because there is no difference between the metabolic product produced by the microbe of the disclosed prior art even though the strain may be different, the metabolic product is the same and is, therefore, considered to be anticipated by the teachings therein.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

The remaining references listed on the enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah K. Ware whose telephone number is 571-272-0924. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mike Wityshyn can be reached on 571-272-0926. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
